TEST STRATEGY OUTLINE

Date: May 2025
By: Routh Kiran Babu

Target customers based on Conditions:

1. During Hungry: Needs speed delivery to the place and update them.
2. During Celebration: Products like cake, etc delivered safely. Provides additional optional products to add to make celebration more exiciting. If possible greetings is given by zomato.

Types of Testing:

1. Exploration testing: Before hand need to have clear idea on what functionalities to be tested like location, search functionalities, Price by weight, comparing with other food delivery apps, etc. Then tester uses creativity to test a particular functionality.

Functionalities Tested:

1. Android Location.
2. OTP verification on time.

Resources Used:

1. Basic Knowledge on Android and apps on UI/UX.
2. Excel sheet to save the test steps.
